

Dear Sirs;

I would like to ask you to please stop the National Association of Broadcasters attempt to halt the satellite radio services (XM-radio and Sirius) from broadcasting local traffic and weather information to its subscribers. I have been a subscriber to XM-Radio since August, 2003 and I just don't want to consider having to go back to commercial based radio. I do not believe the NAB should be able to dictate what services my subscription based radio service can or cannot provide. Please listen to the voice of the people and allow us to listen to satellite radio unhindered. Please don't forget the First Amendment and the rights of the public to be informed.
